***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, drawn to a method of detecting an analyte particle in a fluid, classified in class 435, subclass 7.1.
- II. Claims 9-21, drawn to a laboratory device comprising chambers and a filter, classified in class 422, subclass 68.1.

The inventions are distinct, each from the other because of the following reasons:

Groups I and II are separate and distinct. While the method of Group I MAY be performed using the chip of Group II the method is not so limited and may also be performed using any appropriate filtration means.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
